Fax (+34) 976 35 32 26

GEOLOGÍA

001 Anderson, J. B.: *Antarctic Marine Geology*

2000 – 300 pp. €28,70

002 Arche, A., ed.: *Sedimentología. Del proceso físico a la cuenca sedimentaria*

2010 – 1.287 pp., fig. €96,00

ÍNDICE: A. Arche: Prólogo — A. Arche: Facies, sedimentología y análisis sedimentarias — J. F. García-Hidalgo & al.: Ambientes eólicos — A. Sopena / Y. Sánchez-Moya: Los sistemas aluviales — F. Colombo: Abanicos aluviales: procesos de transporte y acumulación de materiales detríticos — E. Colombo: Abanicos aluviales: secuencias y modelos de sedimentación — Y. Sánchez-Moya / A. Sopena: Sistemas aluviales de baja sinuosidad — C. Viseras / J. Fernández: Sistemas aluviales de alta sinuosidad — M. A. Fregenal / N. Meléndez: Lagos y sistemas lacustres — J. A. Análisis de la procedencia en depósitos arenosos — C. J. Darrio: Playas — C. J. Darrio: Plataformas siliciclásticas — J. P. Rodríguez López / A. Arche: Deltas — F. Villas & al.: Estuarios, ríos y llanuras intermareales — E. Ortí: Evaporitas: introducción a la sedimentología evaporítica — F. Ortí: Evaporitas: formaciones marinas y continentales. Algunos ejemplos — M. I. Benito / A. Alonso: La sedimentación carbonática en mares someros: las plataformas carbonáticas — J. M. Martín / J. C. Braga: Arrecifes — J. Martín-Chivelet & al.: Contornitas y sistemas deposicionales contorníticos — R. Marfil / M. A. Caja: Diagénesis de rocas detríticas — C. Rossi: Introducción a la diagénesis de las rocas carbonáticas — A. Arche / J. López-Gómez: Relaciones entre sedimentación y tectónica — M. H. Iriondo: Las grandes llanuras.

003 Artemieva, I.: *The Lithosphere. An Interdisciplinary Approach*

2011 – 794 pp., 417 fig., 45 tabl. €107,65

ÍNDICE: Preface — What is the lithosphere? — Age of the lithosphere — Seismic structure of the lithosphere — Thermal regime of the lithosphere from heat flow data — Thermal state of the lithosphere from non-thermal data — CBL and lithospheric density from petrologic and geophysical data — Electrical structure of the lithosphere — Flexure and rheology — Evolution of the lithosphere — Summary of lithospheric properties.

004 Barry, R. / Thian Yew Gan: *The Global Cryosphere. Past, Present and Future*

2011 – 498 pp., 42 fig., 46 lám.col., 24 tabl. €50,85

ÍNDICE: Introduction — *Part I. The Terrestrial Cryosphere:* Snow cover — Avalanches — Glaciers and ice caps — Ice sheets — Seasonally frozen ground and permafrost — Freshwater ice: lakes, rivers and icings — *Part II. The Marine Cryosphere:* Sea ice — Ice shelves and icebergs — *Part III. The Cryosphere Past and Future:* The cryosphere in the past — The future cryosphere — impacts of global warming — *Part IV. Applications:* Applications of snow and ice research — Glossary.

005 Baskaran, M., ed.: *Handbook of Environmental Isotope Geochemistry*, 2 vols.

2012 – xxi + 951 pp., 554 fig. €213,95

ÍNDICE: Volume I: *Part I. Introductory Chapters:* M. Baskaran: «Environmental Isotope Geochemistry»: Past, Present and Future — D. Porcelli / M. Baskaran: An Overview of Isotope Geochemistry in Environmental Studies — K. K. Turekian: Humans and Isotopes: Impacts and Tracers of Human Interactions with the Environment — *Part II. Isotopes as Tracers of Continental and Aquatic Processes:* K.W. Burton / N. Vigier: Lithium Isotopes as Tracers in Marine and Terrestrial — Environments — J. M. Kaste / M. Baskaran: Meteoric ⁷Be and ¹⁰Be as Process Tracers in the Environment — B. Reynolds: Silicon Isotopes as Tracers of Terrestrial Processes — L. C. Nielsen & al.: Calcium Isotopes as Tracers of Biogeochemical Processes — M. Rehkamper & al.: Natural and Anthropogenic Cd Isotope Variations — T. M. Johnson: Stable Isotopes of Cr and Se as Tracers of Redox Processes in Earth Surface Environments — T. D. Bullen: Stable Isotopes of Transition and Post-Transition Metals as Tracers in Environmental Studies — M. Sharma: Applications of Osmium and Iridium as Biogeochemical Tracers in the Environment — J. D. Blum: Applications of Stable Mercury Isotopes to Biogeochemistry — S. G. Nielsen / M. Rehkamper: Thallium Isotopes and Their Application to Problems in Earth and Environmental Science — G. Kim & al.: Po-210 in the Environment: Biogeochemical Cycling and Bioavailability — J. T. Kulongoski / D. R. Hilton: Applications of Groundwater Helium — J. Z. Du & al.: Applications of Short-Lived Radionuclides (⁷Be, ²¹⁰Pb, ²¹⁰Po, ¹³⁷Cs and ²³⁴th) to Trace the Sources, Transport Pathways and Deposition of Particles/Sediments in Rivers, Estuaries and Coasts — L. Zhang & al.: Radium Isotope Tracers to Evaluate Coastal Ocean Mixing and Residence Times — C.G. Smith & al.: Natural Radium and Radon Tracers to Quantify Water Exchange and Movement in Reservoirs — G.-H. Hong & al.: Applications of Anthropogenic Radionuclides as Tracers to Investigate Marine

Environmental Processes — M. E. Ketterer & al.: Applications of Transuranics as Tracers and Chronometers in the Environment — A. Paytan / K. McLaughlin: Tracing the Sources and Biogeochemical Cycling of Phosphorus in Aquatic Systems Using Isotopes of Oxygen in Phosphate — N. C. Sturchio & al.: Isotopic Tracing of Perchlorate in the Environment — N. E. Ostrom / P. H. Ostrom: The Isotopomers of Nitrous Oxide: Analytical Considerations and Application to Resolution of Microbial Production Pathways — D. Lal: Using Cosmogenic Radionuclides for the Determination of Effective Surface Exposure Age and Time-Averaged Erosion Rates — G. Matisoff / P. J. Whiting: Measuring Soil Erosion Rates Using Natural (^7Be , ^{210}Pb) and Anthropogenic (^{137}Cs , $^{239,240}\text{Pu}$) Radionuclides — G. R. Tripathy & al.: Sr and Nd Isotopes as Tracers of Chemical and Physical Erosion — N. Vigier / B. Bourdon: Constraining Rates of Chemical and Physical Erosion Using U-Series Radionuclides — **Volume II: Part III. Isotopes as Tracers of Atmospheric Processes:** D. Lal / M. Baskaran: Applications of Cosmogenic Isotopes as Atmospheric Tracers — K. Hirose: Uranium, Thorium and Anthropogenic Radionuclides as Atmospheric Tracers — G. Michalski & al.: Oxygen Isotope Dynamics of Atmospheric Nitrate and its Precursor Molecules — **Part IV. Isotopes as Tracers of Environmental Forensics:** R. P. Philp / G. Lo Monaco: Applications of Stable Isotopes in Hydrocarbon Exploration and Environmental Forensics — W. Vetter: Utility of Stable Isotopes of Hydrogen and Carbon as Tracers of POPs and Related Polyhalogenated Compounds in the Environment — **Part V. Isotopes as Tracers in Archaeology and Anthropology:** L. A. Chesson & al.: Light-Element Isotopes (H, C, N, and O) as Tracers of Human Diet: A Case Study on Fast Food Meals — H. P. Schwarcz / M. J. Schoeninger: Stable Isotopes of Carbon and Nitrogen as Tracers for Paleo-Diet Reconstruction — N. M. Slovak / A. Paytan: Applications of Sr Isotopes in Archaeology — B. L. Gulson: Sources of Lead and Its Mobility in the Human Body Inferred from Lead Isotopes — **Part VI. Isotopes as Tracers of Paleoclimate and Paleoenvironments:** M. Baskaran: Dating of Biogenic and Inorganic Carbonates Using ^{210}Pb - ^{226}Ra Disequilibrium Method: A Review — S. R. Managave / R. Ramesh: Isotope Dendro-climatology: A Review with a Special Emphasis on Tropics — J. Savarino / S. Morin: The N, O, S Isotopes of Oxy-Anions in Ice Cores and Polar Environments — A. Landais: Stable Isotopes of N and Ar as Tracers to Retrieve Past Air Temperature from Air Trapped in Ice Cores.

006 Bengtsson, L. & al.: *The Earth's Cryosphere and Sea Level Change*
2012 – vii + 343 pp., 110 fig. €128,35

ÍNDICE: Introduction — Climate change challenges — *I. Long-Term Variation of the Earth's Cryosphere:* Climates of the Earth and cryosphere evolution — *II. Observational Studies on Land Ices:* Overview and assessment of Antarctic ice-sheet mass balance estimates: 1992 - 2009 — Present day regional mass loss of Greenland observed with satellite gravimetry — Interaction between the warm subsurface Atlantic water in the Sermilik Fjord and Helheim glacier in southeast Greenland — *III. The Dynamics of Land Ices:* Response of the Greenland and Antarctic ice sheets to multi-millennial greenhouse warming in the Earth system model of intermediate complexity LOVECLIM — Representing grounding line dynamics in numerical ice sheet models. Recent advances and outlook — Understanding and modelling rapid dynamic changes of tidewater outlet glaciers: issues and implications — *IV. Modelling of the Mass Balance of the Land Ices:* Large-scale surface mass balance of ice sheets from a comprehensive

atmospheric model — Precipitation changes in high southern latitudes from global reanalyses: A cautionary tale — Ice sheets and sea level: thinking outside the box — A downscaling approach towards high-resolution surface mass balance over Antarctica — *V. Glacier Observation and Modelling*: Estimating the glacier contribution to sea-level rise for the period 1800-2005 — Observed mass balance of mountain glaciers and Greenland ice sheet in the 20th century and the present trends — Present state and prospects of ice sheet and glacier modeling — *VI. Sea Level and Geodynamic Effects*: Sea-level rise from the late 19th to the early 21st century — Evidence for century-timescale acceleration in mean sea levels and for recent changes in extreme sea levels — Response of a coupled ocean-atmosphere model to Greenland ice melting — GOCE, satellite gravimetry and Antarctic mass transports.

007 Bethke, C. M.: *Geochemical and Biogeochemical Reaction Modeling* 2007² – 563 pp. €37,10

008 Beynen, P. E., ed.: *Karst Management*

2011 – x + 489 pp., 158 fig. €139,05

ÍNDICE: Introduction — *1. Management of Surface Karst*: Engineering Issues on Karst — Karst Management — Experience in Collapse Risk Assessment of Building on Covered Karst Landscapes in Russia — Agriculture and Karst — *2. Management of Subterranean Karst*: Management of Caves — Some Consideration on Show Cave Management Issues in Southern Italy — Geoarchaeology and Karst: A New Perspective — Managing Macrobiota in Caves — Managing Microbial Communities in Caves — *3. Management of Karst Aquifers*: Management of Carobante Aquifers — Management of Karst Groundwater Resources — Management of Groundwater Species in Karst Environments — *4. Management of Karst Regions as Integrated Units*: National Karst Research Institutes: Their Roles in Cave and Karst Management — Using Public Policy to Affect Human Behaviour on Karst Landscapes in the United States — Karst and Sustainability — Human Disturbances of Karst Environments — The Cockpit Country, Jamaica: Boundary Issues in Assessing Disturbance and Using a Karst Disturbance Index in Protected Areas Planning — Expanding South Nahanni National Park, Northwest Territories, Canada, to Include and Manage Some Remarkable Sub-arctic Karst Terrains — Protection of Karst Landscapes in the Developing World: Lessons from Central America, the Caribbean and Southeast Asia — Karst in UNESCO World Heritage Sites.

009 Buol, S. W.: *Soil Genesis and Classification*

2011⁶ – 560 pp., fig. €72,50

010 Burbank, D. W. / R. S. Anderson: *Tectonic Geomorphology*

2011² – 472 pp., fig. €45,00

011 Chen, Y. / D. C. Booth: *The Wenchuan Earthquake of 2008. Anatomy of a Disaster*

2011 – 280 pp., 170 fig. €106,95

012 Ehlers, J. / P. L. Gibbard / P. D. Hughes, eds.: *Quaternary Glaciations - Extent and Chronology. A Closer Book*

2011 – 1.126 pp. €218,40

ÍNDICE: Introduction — Austria — Belarus — Czechia — Denmark — England, 1 — England, 2 — Estonia — Finland — France — Pyrenees — Caucasus — North Germany — South Germany — Greece — Iceland — Italy — Latvia — Lithuania — Netherlands — North Sea Basin — Norway — Poland — Romania — Russia North — Russian Plain — Barents Sea — Russian Arctic — Slovenia — Turkey — Ukraine — North America Magnetostratigraphy — Alaska — California — Hawaii — Illinois — Michigan — Minnesota — Ohio — Pennsylvania — Washington — Wisconsin — Missouri — British Columbia — Alberta — Canadian Prairies — Quebec — Maritime Canada — NW Canada — Greenland — Southern Patagonia — Northern Patagonia — Aconcagua — Chile — Bolivia — Ecuador Peru Bolivia — Ecuador, 2 — Colombia — Venezuela — Costa Rica — Mexico — Afghanistan — Northeast Asia — Werkhoyansk Mountains — Siberian Mountains — Pakistan — India — High Asia — Altai — China — Taiwan — Japan — Southeast Asia — Australia — New Zealand — Morocco — Kenya — South Africa.

013 Florinsky, I.: *Digital Terrain Analysis in Soil Science and Geology*

2012 – 432 pp. €112,50

ÍNDICE: Digital terrain modeling: a brief historical overview — *Part I. Principles and Methods of Digital Terrain Modeling:* Morphometric variables — Digital elevation models — Calculation methods — Errors and accuracy — Filtering — Mapping and visualization — *Part II. Digital Terrain Modeling in Soil Science:* Influence of topography on soil properties — Adequate resolution of models — Predictive soil mapping — Analyzing relationships in the system «topography-soil» — *Part III. Digital Terrain Modeling in Geology:* — Folds and folding — Lineaments and faults — Accumulation zones and fault intersections — Global topography and tectonic structures — Synthesis — *Appendices:* The mathematical basis of local morphometric variables, by Shary, P. A. — LandLord - a brief description of the software.

014 García Ruiz, J. M. y otros: *El relieve del alto Aragón occidental. Cartografía y síntesis geomorfológica*

2011 – 91 pp., 32 lám.col., 6 despl. €10,00

015 Gupta, A.: *Tropical Geomorphology*

2011 – 400 pp., 150 fig., 35 tabl. €53,85

ÍNDICE: *Part I. The Tropical Environment:* Geomorphology and the tropics — Geological framework of tropical lands — Tropical hydrology — Land cover in the tropics — *Part II. Tropical Geomorphology:* Weathering in the tropics — Tropical slopes: form and function — Rivers in the tropics — Alluvial valleys — Large tropical rivers — The tropical coast — Tropical deltas — The arid tropics — Tropical highlands — Volcanic landforms — Tropical karst — Quaternary in the tropics — *Part III. Anthropogenic Changes:* Anthropogenic alteration of geomorphic processes in the tropics — Urban geomorphology in the tropics — The future with climate change.

016 Gygi, R.: *Quantitative Geology of Epicontinental Sediments of the Late Jurassic in the Jura Mountains of Switzerland*

2012 – x + 185 pp. €64,15

017 Higgins, M. D.: *Quantitative Textural Measurements in Igneous and Metamorphic Petrology*

2006 – 276 pp. €29,90

018 Hutter, K. / Y. Wang / P. Chubarenko: *Physics of Lakes, 2: Lakes as Oscillators*

2011 – lxxviii + 646 pp., 264 fig. €213,95

019 Ismail-Zadeh, A. / P. Tackley: *Computational Methods for Geodynamics*

2010 – 336 pp., 45 fig., 6 tabl. €50,25

020 Jaupart, C. / J.-C. Mareschal: *Heat Generation and Transport in the Earth*

2010 – 476 pp., 164 fig., 40 tabl. €53,85

021 Jones, R. W.: *Applications of Palaeontology. Techniques and Case Studies*

2011 – 420 pp., 171 fig. €95,70

ÍNDICE: Work-flows in applied palaeontology — Biostratigraphy and allied disciplines, and stratigraphic time-scales — Palaeobiology — Sequence stratigraphy — Petroleum geology — Mineral exploration and exploitation — Coal geology and mining — Engineering geology — Environmental science — Other applications and case studies.

022 Joseph, A.: *Tsunamis. Detection, Monitoring and Early-Warning Technologies*

2011 – 448 pp., fig. €97,00

ÍNDICE: Introduction — Tsunami Generation and Historical Aspects — Tsunami Databases — Geophysical Tsunami Hydrodynamics — Impact of a Tsunami on Coastal and Island Habitats — The Protective Role of Coastal Ecosystems — Earthquake Detection and Monitoring for Early Warnings of Seismogenic Tsunamis — Numerical Models for Forecasting — The Role of IOC-UNESCO in Tsunami Early Warnings — Earthquake Monitoring for Early Tsunami Warnings — Open Ocean Tsunami Detection — Land-Based Measurements of Inundation to Confirm Tsunamigenesis — The Technology of End-to-End Communication: Sending the Message — IOC-UNESCO Tsunami Early Warning Systems — Technological Challenges In Detecting Tsunamis — Sea-Level Measurements From Coasts and Islands — Sea Level Measurements From Deep-Sea Regions — Telemetry of Sea-Level Data — Evaluating and Assessing Tsunamis Technologies — Extracting Tsunami Signals From Sea-Level Records — Conclusions.

023 Keller, G. R. / C. Baru, eds.: *Geoinformatics. Cyberinfrastructure for the Solid Earth Sciences*

2011 – 388 pp., 46 fig., 5 tabl. €95,70

ÍNDICE: *Introduction:* G. R. Keller: Science needs and challenges for geoinformatics — C. Baru Introduction to IT concepts and challenges — *Part I. Case Studies from Other Disciplines:* P. Fox / D. L. McGuinness: Semantic cyberinfrastructure: the virtual solar-terrestrial observatory — S. Krishnan / R. Madduri: Cyberinfrastructures for life sciences and biomedicine — *Part II. Modeling Software and Community Codes:* M. Gurnis & al.: Development, verification and maintenance of computational software in geodynamics — M. Liu & al.: Parallel finite element modeling of multi-timescale faulting and lithospheric deformation in the western U.S. — J. A. Boyden & al.: Next-generation plate-tectonic reconstructions using GPlates — *Part III. Visualization and Data Representation:* A. Chourasia: Visualization of seismic model data — S. Wier / C. Meertens: The UNAVCO GEON Integrated Data Viewer for exploration, analysis, and integration of geoscience data — *Part IV. Knowledge Management and Data Integration:* P. Sadler / C. Cervato: Data and tools for geologic timelines and timescales — H. Babaie: Modeling geodynamic processes with ontologies — *Part V. Web Services and Scientific Workflows:* I. Zaslavsky / D. Maidment: Service orientation in the design of a community hydrologic information system — R. Casey / T. Ahern: Web services for seismic data archives — R. Aldouri / G. Randy Keller: Development of robust data system for gravity and magnetic anomaly data: a case study of a community-based effort for point data — I. Altintas & al.: Scientific workflows for the geosciences: an emerging approach to building integrated data analysis systems — C. Crosby & al.: Online access and processing of Lidar topography data — A. Gates & al.: Use of abstraction to support geoscientists' understanding and production of scientific artifacts — *Part VI. Emerging International and Other Efforts:* I. Jackson / R. Hughes: It's not your data, it's everyone's: the benefits of a corporate approach to scientific information — S. Cloetingh / H. P. Bunge: TOPO-EUROPE and cyberinfrastructure: quantifying coupled deep earth-surface processes in 4D — I. Jackson: OneGeology – from concept to global project — J. Klump & al.: Geoinformatics developments in Germany — K. V. Subbarao & al.: iGEON: networking the Indian geosciences community through GEON — M. L. Allison & al.: Geoinformatics in the public service: building a cyberinfrastructure across the geological surveys — S. M. Richard & al.: Application of the U.S. geoscience information network to deploying a national geothermal data system.

024 Krinsley, D. H. & al.: *Atlas of Quartz Sand Surface Textures*

2011 – 101 pp. €17,95

025 Loczy, D. / M. Stankoviansky / A. Kotarba, eds.: *Recent Landform Evolution. The Carpatho-Balkan-Dinaric Region*

2012 – x + 390 pp. €139,05

026 MacDougall, D.: *Why Geology Matters. Decoding the Past, Anticipating*

the Future

2011 – 304 pp., 33 fig., map. €25,20

027 Maher, B. A. / R. Thompson, eds.: *Quaternary Climates, Environments and Magnetism*

1999 – 412 pp. €28,70

028 Martí Molist, J.: *Los volcanes*

2011 – 142 pp. €12,00

¿Qué sabemos de?, 23.

029 Muttiah, R. S.: *Carbonate Systems During the Oligocene-Miocene Climatic Transition*

2010 – 312 pp., fig. €90,00

ÍNDICE: M. Mutti & al.: Miocene carbonate systems: an introduction — K. Billups / K. Scheiderich: A synthesis of Late Oligocene through Miocene deep sea temperatures as inferred from foraminiferal Mg/Ca Ratios — C. Perrin / W. Kiessling: Latitudinal trends in Cenozoic reef patterns and their relationship to climate — P. Kindler / M. Wilson: Carbonate grain associations: their use and environmental significance, a brief review — J. M. Martín & al.: Temperate and tropical carbonate sedimentation episodes in the Neogene Betic basins (southern Spain) linked to climatic oscillations and changes in Atlantic-Mediterranean connections: constraints from isotopic data — C. Ruchonnet / P. Kindler: Facies models and geometries of the Ragusa Platform (SE Sicily, Italy) near the Serravallian-Tortonian boundary — M. Brandano & al.: The sensitivity of a tropical foramolrhodalgal carbonate ramp to rapid sea-level change: Miocene of the central Apennines, Italy — M. Brandano & al.: Facies and sequence architecture of a tropical foramol-rhodalgal carbonate ramp: Miocene of the central Apennines (Italy) — M.-F. Benisek & al.: Facies and stratigraphic architecture of a Miocene warm-temperate to tropical fault-block carbonate platform, Sardinia (Central Mediterranean Sea) — M. Brandano / W. E. Piller: Coralline algae, oysters and echinoids - a liaison in rhodolith formation from the Burdigalian of the Latium-Abruzzi Platform (Italy) — J. C. Braga, D. Bassi / W. E. Piller: Palaeoenvironmental significance of Oligocene-Miocene coralline red algae - a review — M. Harzhauser / W. E. Piller: Molluscs as a major part of subtropical shallow-water carbonate production - an example from a Middle Miocene oolite-shoal (Upper Serravallian, Austria) — A. Kroh / J. H. Nebelsick: Echinoderms and Oligo-Miocene carbonate systems: potential applications in sedimentology and environmental reconstruction — F. R. Bosellini / C. Perrin: Coral diversity and temperature: a palaeoclimatic perspective for the Oligo-Miocene of the Mediterranean region — Y. Iryu & al.: Late Oligocene to Miocene reef formation on Kitadaito-jima, northern Philippine Sea — M. Vigorito & al.: Carbonate production in rift basins: models for platform inception, growth and dismantling, and for shelf to basin sediment transport, Miocene Sardinia Rift Basin, Italy.

030 Oliver, R. L. / P. R. James / J. B. Jago, eds.: *Antarctic Earth Science*

1983 – 720 pp. €38,30

031 Oppenheimer, C.: *Eruptions That Shook the World*

2011 – 408 pp., 100 fig., 10 tabl. €22,76

ÍNDICE: Fire and brimstone: how volcanoes work — Eruption styles, hazards and ecosystem impacts — Volcanoes and global climate change — Forensic volcanology — Relics, myths and chronicles — Killer plumes — Human origins — The ash-giant/sulphur-dwarf — European volcanism in prehistory — The rise of Teotihuacán — Dark Ages: dark nature? — The Haze famine — The last great subsistence crisis in the western world — Volcanic catastrophe risk.

032 Pais, J.: *The Paleogene and Neogene of Western Iberia (Portugal). A Cenozoic Record in the European Atlantic Domain*

2011 – vi + 156 pp., 37 fig. €53,45

033 Patiño Douce, A.: *Thermodynamics of the Earth and Planets*

2011 – 722 pp., 200 fig., 10 tabl. €59,80

ÍNDICE: Energy in planetary processes and the First Law of Thermodynamics — Energy sources in planetary bodies — Energy transfer processes in planetary bodies — The Second Law of Thermodynamics and thermodynamic potentials — Chemical equilibrium: using composition as a thermodynamic variable — Phase equilibrium and phase diagrams — Critical phase transitions — Equations of state for solids and the internal structure of terrestrial planets — Thermodynamics of planetary volatiles — Melting in planetary bodies — Dilute solutions — Non-equilibrium thermodynamics and rates of natural processes — Topics in atmospheric thermodynamics and radiative energy transfer — Thermodynamics of life.

034 Penven, M. J. / H. Regnaud / D. Mercier, eds.: *Mobilité des formes et surfaces terrestres: des changements passés aux changements actuels*

2011 – 222 pp., fig. €18,00

035 Rappaport, R.: *Studies on Eighteenth-Century Geology*. Edited by K. L. Taylor and M. Rudwick

2011 – 366 pp., 3 map. €96,00

ÍNDICE: *Part I. Chemistry:* G-F. Rouelle: an 18th-century chemist and teacher — Rouelle and Stahl: the phlogistic revolution in France — *Part II. The Mineralogical Atlas:* Lavoisier's geologic activities, 1763–1792 — Lavoisier's theory of the Earth — The geological atlas of Guettard, Lavoisier and Monnet: conflicting views of the nature of geology — The early disputes between Lavoisier and Monnet, 1777–1781 — *Part III. Understanding the Earth and Its History:* Hooke on earthquakes: lectures, strategy and audience — Fontenelle interprets the Earth's history — Leibnitz on geology: a newly discovered text — Geology and orthodoxy: the case of Noah's Flood in 18th-century thought — *Part IV. The Language of Earth Science:* Borrowed words: problems of vocabulary in 18th-century geology — Dangerous words: diluvialism, Neptunism, catastrophism — *Part V. Scientific Pursuits in Early Modern Europe:* Italy and Europe: the case of Antonio Vallisneri (1661–1730) — Baron d'Holbach's

campaign for German (and Swedish) science — Government patronage of science in 18th-century France — The liberties of the Paris Academy of Sciences, 1716-1785.

036 Rumynin, V. G.: *Subsurface Solute Transport Models and Case Histories with Applications to Radionuclide Migration*

2011 – xxi + 860 pp., 309 fig. €139,05

037 Schon, J. H.: *Physical Properties of Rocks. A Workbook*

2011 – 494 pp., fig. €149,15

038 Shannon, P.: *The Petroleum Geology of Ireland*

2010 – 272 pp., fig., map. €149,50

039 Sieveking, G. de G. / M. B. Hart, eds.: *The Scientific Study of Flint and Chert. Proceedings of the Fourth International Flint Symposium Held at Brighton Polytechnic 10-15 April 1983*

1986 – 306 pp., fig. €28,70

040 Singer, A. / E. Galan, eds.: *Developments in Palygorskite-Sepiolite Research. A New Outlook on These Nanomaterials*

2011 – 520 pp., fig. €122,80

ÍNDICE: *Part 1. Advances in the Structure and Chemistry of Sepiolite and Palygorskite:* The Structures and Microtextures of the Palygorskite-Sepiolite Group Minerals — Advances in the Crystal Chemistry of Sepiolite and Palygorskite — *Part 2. Palygorskite-Sepiolite Geochemistry, Genesis and Deposits:* Environmental Influences on the Occurrences of Sepiolite and Palygorskite: a Brief Review — An Introduction to Palygorskite and Sepiolite Deposits - Location, Geology and Uses — Palygorskite Clays in Marine Sediments: Records of Extreme Climate — Palygorskite and Sepiolite Deposits in Continental Environments. Description, Genetic Patterns and Sedimentary Settings — Sepiolite-Palygorskite Occurrences in Turkey — Genesis and Distribution of Palygorskite in Iranian Soils and Sediments — Evidence for the Biogenic Origin of Sepiolite — Overview of Chinese Palygorskite Clay Resources - their Geology, Mineralogy, Depositional Environment, Applications and Processing — Amargosa Sepiolite and Saponite Geology, Mineralogy and Markets — *Part 3. Applications: Industry, Environment, Advanced Materials, Others:* Current Industrial Applications of Palygorskite and Sepiolite — Pharmaceutical and Cosmetic Uses of Fibrous Clays — The Effects of Palygorskite on Chemical and Physico-Chemical Properties of Soils — Adsorption of Surfactants, Dyes and Cationic Herbicides on Sepiolite and Palygorskite: Modifications, Applications and Modeling — Sepiolite and Palygorskite as Sealing Materials for the Geological Storage of Carbon Dioxide — Advanced Materials and New Applications of Sepiolite and Palygorskite — The Maya Blue Pigment.

041 Smith, M. / P. Paron / J. Griffiths: *Geomorphological Mapping. Methods and Applications*

2011 – 610 pp., fig. €150,80

ÍNDICE: 1. *Geomorphological Mapping*: Introduction to Applied Geomorphological Mapping — Old and New Trends in Geomorphological and Landform Mapping — Nature and Aims of Geomorphological Mapping — Makers and Users of Geomorphological Maps — Geomorphological Contributions to Landslide Risk Assessment: Theory and Practice — 2. *Techniques in Applied Geomorphological Mapping*: Geomorphological Field Mapping — Data Sources — Digital Mapping: Visualisation, Interpretation and Quantification of Landforms — Cartography: Design, Symbolisation and Visualisation of Geomorphological Maps — Semi-Automated Identification and Extraction of Geomorphological Features using Digital Elevation Data — 3. *Case Studies*: Mapping Ireland's Glaciated Continental Margin Using Marine Geophysical Data — Submarine Geomorphology: Quantitative Methods Illustrated with the Hawaiian Volcanoes — Marine Geomorphology: Geomorphological Mapping and the Study of Submarine Landslides — The Cherry Garden Landslide, Etchingill Escarpment, Southeast England — The Application of Geomorphological Mapping in the Assessment of Landslide Risk in Hong Kong — A Geomorphological Map as a Tool for Assessing Sediment Transfer Processes in Small Catchments Prone to Debris-Flows Occurrence: A Case Study in the Bruchi Torrent (Swiss Alps) — Geomorphological Assessment of Complex Landslide Systems Using Field Reconnaissance and Terrestrial Laser Scanning — Digital Terrain Models From Airborne Laser Scanning for the Extraction of Natural and Anthropogenic Linear Structures — Applied Geomorphic Mapping for Land Management in the River Murray Corridor, SE Australia — Monitoring Braided River Change Using Terrestrial Laser Scanning and Optical Bathymetric Mapping — Uses and Limitations of Field-Mapping of Lowland Glaciated Landscapes — Mapping Late-Holocene Landscape Evolution and Human Impact - A Case-Study from Lower Khuzestan (SW Iran) — Military Applied Geomorphological Mapping: Normandy Case Study — Future Developments of Geomorphological Mapping.

042 Steno: *Geological Papers*. Edited by G. Scherz

1969 – 370 pp. €44,00

043 Tawadros, E. E.: *Geology of North Africa*

2011 – 952 pp., fig. €191,50

ÍNDICE: *Part 1. History of Geology and Hydrocarbon Exploration in North Africa*: Introduction — *Part 2. Tectonic Framework of North Africa*: Northeast Africa's Basins — Tertiary volcanics — Northwest Africa's Basins — *Part 3. Pan-African Shield & West African Craton*: Precambrian — *Part 4. Phanerozoic Geology of North Africa*: Phanerozoic geology of Egypt — Mesozoic — Tertiary — Tertiary-Quaternary — Quaternary (Pleistocene-Holocene) — Phanerozoic geology of Libya — Paleozoic — Mesozoic — Tertiary — Phanerozoic geology of Algeria — Phanerozoic geology of Tunisia — Phanerozoic geology of Morocco — *Part 5. Petroleum Geology & Petroleum Systems of North Africa*: Petroleum Geology & Petroleum Systems of North Africa — Hydrocarbon systems in North Africa — *Part 6. Phanerozoic Geological History*: Phanerozoic geological history.

044 Thomson, M. R. A. / J. A. Crame / J. W. Thomson, eds.: *Geological Evolution of Antarctica*

1991 – 738 pp. €47,85

045 Varotsos, C. / N. Sarlis / E. Skordas: *Natural Time Analysis. The New View of Time. Precursory Seismic Electric Signals, Earthquakes and Other Complex Time Series*

2011 – x + 476 pp., 199 fig. €139,05

046 Wagner, W.: *Groundwater in the Arab Middle East*

2011 – xxviii + 443 pp., 114 fig. €139,05

047 Wegener, A.: *El origen de los continentes y océanos*. Prólogo J. Pérez Mercader. Estudio introductorio F. Anguita Virella

2011 – 281 pp., fig. €22,00

048 Woo, M.: *Permafrost Hydrology*

2012 – xii + 514 pp., 442 fig. €266,45

049 Yamada, Y. & al.: *Submarine Mass Movements and Their Consequences*.

5th International Symposium

2011 – xxxi + 756 pp., 294 fig. €139,05

ÍNDICE: Submarine Mass Movements and Their Consequences — *Part I. Physical Properties of Sediments and Slope Stability Assessment: Risk Assessment for Earthquake-Induced Submarine Slides* — Shallow Landslides and Their Dynamics in Coastal and Deepwater Environments, Norway — Physical Properties and Age of Continental Slope Sediments Dredged from the Eastern Australian Continental Margin – Implications for Timing of Slope Failure — Submarine Landslides on the Upper Southeast Australian Passive Continental Margin – Preliminary Findings — Development and Potential Triggering Mechanisms for a Large Holocene Landslide in the Lower St. Lawrence Estuary — Spatially Fixed Initial Break Point and Fault-Rock Development in a Landslide Area — Pore Water Geochemistry as a Tool for Identifying and Dating Recent Mass-Transport Deposits — An In-Situ Free-Fall Piezocone Penetrometer for Characterizing Soft and Sensitive Clays at Finneidfjord (Northern Norway) — Static and Cyclic Shear Strength of Cohesive and Non-cohesive Sediments — Upstream Migration of Knickpoints: Geotechnical Considerations — *Part II. Seafloor Geomorphology for Trigger Mechanisms and Landslide Dynamics: A Reevaluation of the Munson-Nygren-Retriever Submarine Landslide Complex, Georges Bank Lower Slope, Western North Atlantic* — Submarine Landslides in Arctic Sedimentation: Canada Basin — Extensive Erosion of the Deep Seafloor – Implications for the Behavior of Flows Resulting from Continental Slope Instability — Investigations of Slides at the Upper Continental Slope Off Vesterålen, North

Norway — Dakar Slide Offshore Senegal, NW-Africa: Interaction of Stacked Giant Mass Wasting Events and Canyon Evolution — Large-Scale Mass Wasting on the Northwest African Continental Margin: Some General Implications for Mass Wasting on Passive Continental Margins — Deep-Seated Bedrock Landslides and Submarine Canyon Evolution in an Active Tectonic Margin: Cook Strait, New Zealand — Polyphase Emplacement of a 30 km³ Blocky Debris Avalanche and Its Role in Slope-Gully Development — Slope Failure and Canyon Development Along the Northern South China Sea Margin — Distinguishing Sediment Bedforms from Sediment Deformation in Prodelta of the Mediterranean Sea — Hydroacoustic Analysis of Mass Wasting Deposits in Lake Ohrid (FYR Macedonia/Albania) — New Evidence of Holocene Mass Wasting Events in Recent Volcanic Lakes from the French Massif Central (Lakes Pavin, Montcineyre and Chauvet) and Implications for Natural Hazards — *Part III. Role of Fluid Flow in Slope Instability: A Review of Overpressure, Flow Focusing, and Slope Failure* — How Do ~2° Slopes Fail in Areas of Slow Sedimentation? A Sensitivity Study on the Influence of Accumulation Rate and Permeability on Submarine Slope Stability — The BGR Slide Off Costa Rica: Preconditioning Factors, Trigger, and Slide Dynamics — Detailed Observation of Topography and Geologic Architecture of a Submarine Landslide Scar in a Toe of an Accretionary Prism — Possible Ground Instability Factor Implied by Slumping and Dewatering Structures in High-Methane-Flux Continental Slope — Identification of Weak Layers and Their Role for the Stability of Slopes at Finneidfjord, Northern Norway — Mass Movements in a Transform Margin Setting: The Example of the Eastern Demerara Rise — *Part IV. Mechanics of Mass-Wasting in Subduction Margins: Slope Failures in Analogue Models of Accretionary Wedges* — Systematic Development of Submarine Slope Failures at Subduction Margins: Fossil Record of Accretion-Related Slope Failure in the Miocene Hota Accretionary Complex, Central Japan — Morphologic Expression of Accretionary Processes and Recent Submarine Landslides Along the Southwestern Pacific Margin of Colombia — Submarine Mass Wasting Off Southern Central Chile: Distribution and Possible Mechanisms of Slope Failure at an Active Continental Margin — An Overview of the Role of Long-Term Tectonics and Incoming Plate Structure on Segmentation of Submarine Mass Wasting Phenomena Along the Middle America Trench — *Part V. Post-Failure Dynamics: Dynamics of Submarine Liquefied Sediment Flows: Theory, Experiments and Analysis of Field Behavior* — Undrained Sediment Loading Key to Long-Runout Submarine Mass Movements: Evidence from the Caribbean Volcanic Arc — Impact Drag Forces on Pipelines Caused by Submarine Glide Blocks or Out-Runner Blocks — A Surging Behaviour of Glacigenic Debris Flows — Failure Processes and Gravity-Flow Transformation Revealed by High-Resolution AUV Swath Bathymetry on the Nice Continental Slope (Ligurian Sea) — Submarine Landslides, Gulf of Mexico Continental Slope: Insights into Transport Processes from Fabrics and Geotechnical Data — *Part VI. Landslide Generated Tsunamis: Tsunamis Generated by Submarine Landslides* — Micro-bathymetric Evidence for the Effect of Submarine Mass Movement on Tsunami Generation During the 2009 Suruga Bay Earthquake, Japan — Re-evaluation of the 1771 Meiwa Tsunami Source Model, Southern Ryukyu Islands, Japan — The 1978 Quick Clay Landslide at Rissa, Mid Norway: Subaqueous Morphology and Tsunami Simulations — Geowave Validation with Case Studies: Accurate Geology Reproduces Observations — Tsunami Hazards for Nuclear Power Plants: Mass Failures, Uncertainty, and Warning — *Part VII. Witnessing and Quasi-Witnessing of Slope Failures: Submarine Slope Response to Earthquake Shaking Within Western Sagami Bay, Central Japan* — Discovery of Submarine Landslide

Evidence Due to the 2009 Suruga Bay Earthquake — Settling of Earthquake-Induced Turbidity on the Accretionary Prism Slope of the Central Nankai Subduction Zone — Study of Recent Small-Scale Landslides in Geologically Active Marine Areas Through Repeated Multibeam Surveys: Examples from the Southern Italy — *Part VIII. Architecture of Mass Transport Deposits/Complexes: Sedimentary Mélanges and Fossil Mass-Transport Complexes: A Key for Better Understanding Submarine Mass Movements?* — The Specchio Unit (Northern Apennines, Italy): An Ancient Mass Transport Complex Originated from Near-Coastal Areas in an Intra-Slope Setting — Internal Stress Fields of a Large-Scale Submarine Debris Flow — Distribution of Submarine Mass Movement Deposits: An Exhumed Basin Perspective — Seismic-Scale Rafted and Remnant Blocks over Salt Ridges in the Espírito Santo Basin, Brazil — Permian and Triassic Submarine Landslide Deposits in a Jurassic Accretionary Complex in Central Japan — Systematic Spatial Variations in the Fabric and Physical Properties of Mass-Transport Deposits in the Ursa Region, Northern Gulf of Mexico — Records of Submarine Landslides in Subduction Input Recovered by IODP Expedition 322, Nankai Trough, Japan — Scientific Drilling of Mass-Transport Deposits in the Nankai Accretionary Wedge: First Results from IODP Expedition 333 — Rock-Magnetostratigraphy of Hawaiian Archipelagic Sediments: Timing of Giant Submarine Landslides of the Hawaiian Ridge — Gravity Flow Deposits in the Deep Rockall Trough, Northeast Atlantic — *Part IX. Relevance of Natural Climate Change in Triggering Slope Failures: Submarine Mass Wasting in Isfjorden, Spitsbergen* — Comparison of Quaternary Glaciogenic Debris Flows with Blocky Mass-Transport Deposits in Orphan Basin, Offshore Eastern Canada — Recent Submarine Landslides on the Continental Slope of Storfjorden and Kveithola Trough-Mouth Fans (North West Barents Sea) — One Million Years of Climatic Generated Landslide Events on the Northwestern Barents Sea Continental Margin.

2012 – xxi + 657 pp., 607 fig. €106,95

ÍNDICE: Part I. Natural Processes and Their Impacts on Human Activity: 1. *Geological Processes:* Seismic processes — Cryogenic processes — Karst — Suffosion — Swamping — Floating earth and quicksands — Swelling and shrinkage — Land subsidence — 2. *Geomorphologic Processes:* Rockfalls — Screens — Avalanches — Landslides — Submarine landslides and turbidity currents — Mud flows — Rock streams — Aulseis — Aeolian processes — Soil erosion — River erosion — Abrasion — 3. *Meteorological Processes:* Tropical cyclones — Extratropical cyclones — Tornadoes — Thunderstorms — Blizzards — Droughts — Precipitation — Atmospheric pressure — Wind — Temperature — Solar radiation — Cloudiness — Humidity — Glaze — Ice-covered ground — 4. *Hydrological Processes:* River floods — Wind-induced surges (coastal floods) — Sea currents — Sea and lake ice — River ice — Ice jams — Waterfalls — Tides — Waves — Glaciers — Rock glaciers — Variation of non-draining lake levels — Upwelling and downwelling — 5. *Biological Processes:* Agricultural pests — Forest pests — Plant diseases — Diseases of animals and humans — Weeds — Bloodsucking insects and animals — Predatory animals — Venomous and poisonous animals and insects — Other dangerous animals — Poisonous plants — Bioinvasions — Biodeterioration — Natural fires — Environmental allergens — 6. *Biogeochemical Processes:* Salinization of soils — Microelementoses — Fish suffocation — Gas bursts from basins — Underground fires — 7. *Cosmic Processes:* Collisions with cosmic bodies — Magnetic storms — Regime of solar illumination — Cosmic radiation — **Part II. Human Impacts on the Environment:** 8. *Electric Power Industry:* Hydropower structures — Thermal power structures — Nuclear power plants — Non-traditional or alternative power structures — Power transmission and communication lines — 9. *Industry:* Chemical industry — Metallurgy — Mechanical engineering — Building materials industry — Woodworking industry — Wood pulp and paper industry — Light industry — Food processing industry — 10. *Mining and Mineral Processing:* Opencast mines — Underground mines — Drag and hydraulic extraction of deposits — In situ and heap leaching — Land oil and gas development — Sea bottom oil and gas development — 11. *Agriculture and forestry:* Agriculture — Forestry — 12. *Transport:* Automobile transport — Railway transport — Pipeline transport — Air transport — Water transport — 13. *Other Kinds of Activity:* Fisheries — Aquaculture — Hunting — Water transfers — Housing and communal services — Recreational activity — Sports activity — Military activity — Space exploration — Health and veterinary services — Ritual activity.

103 Grafton, R. Q. / K. Hussey, eds.: *Water Resources Planning and Management*

2011 – 800 pp., 150 fig., 50 tabl. €65,80

ÍNDICE: Introduction — *Part I. Understanding 'Water':* Climate change and the global water cycle — Understanding global hydrology — Groundwater and surface water connectivity — Understanding the basics of water quality — Inland water ecosystems — Water, biodiversity and ecosystems: reducing our impact — Global food production in a water constrained world: exploring 'green' and 'blue' challenges and solutions — *Part II. Water Resources Planning and Management:* Water law and the search for sustainability: a comparative analysis — Tackling the global water crisis: unlocking international law as fundamental to the peaceful management of the world's shared transboundary waters - introducing 'the H2O paradigm' — Risk and uncertainty in water resources planning and management: a basic introduction — Collaboration and stakeholder engagement — Capacity building and knowledge sharing — Adaptive and integrated management of water resources — Gender and integrated water resource management — Environmental flows: achieving ecological outcomes in variable environments — *Part III. Water Resources Planning and Management - Case Studies:* *Section 1. Water and Waste Water Treatment:* Overcoming water scarcity in Perth, Western Australia — Cities, agriculture and environment - sharing water in and around Hyderabad, South India — Pricing of urban water services: the case of France — Collaborative flood and drought risk management in the Upper Iskar Basin, Bulgaria — *Section 2. Agricultural Water Use:* The role of research and development in drought adaptation on the Colorado River Basin — Climate change in the Murray-Darling Basin: implications for water use and environmental consequences — *Section 3. Urban Water Supply and Management:* The urban water challenge in Australian cities — Water sensitive urban design — Water security for Adelaide, South Australia — *Section 4. Aquatic Ecosystems:* Groundwater contamination in Bangladesh — *Section 5. Industrial and Mining Water Use:* Water issues in Canada's tar sands — Science, governance, and environmental impacts of mines in developing countries: lessons from Ok Tedi in Papua New Guinea — *Section 6. Rural and Remote Communities:* Aboriginal access to water in Australia: opportunities and constraints — Providing for social equity in water markets: the case for an indigenous reserve in northern Australia — *Section 7. Water Infrastructure Design and Operation:* Flood hazard, floodplain policy and flood management — *Section 8. Managing Water Across Borders:* Decision making in the Murray-Darling Basin — Challenges to water cooperation in the lower Jordan River Basin — Adaptation and change in Yellow River management — Managing international river basins: successes and failures of the Mekong River Commission — *Section 9. Market Mechanisms in Water Management:* Inter-sectoral water trading as a climate change adaptation strategy.
